# Avery Dennison<sup>®</sup> TrafficJet<sup>™</sup> Manual Cleaning Cycles

Instructional Bulletin : # 9.09
Revision : # 02
Last Updated : June 2018

#### Introduction

Occasionally before printing, the nozzle check may indicate that nozzles are missing. During printing, you may observe ink contaminating other channels or other quality issue that requires you to perform a Manual Cleaning Cycle. This document explains the process and its features..

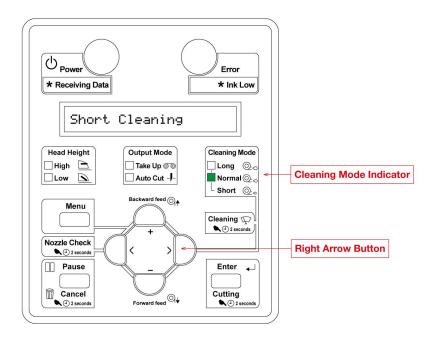

#### **Activate the Manual Cleaning Cycle**

Press the Right Arrow Button for +/- 2 seconds and the Manual Cleaning Cycle will start. You can do this before, during or after printing. If you activate the Cleaning Cycle during the actual printing process the printing will automatically resume after the Cleaning Cycle finishes.

### **Switch Between Different Cleaning Cycles**

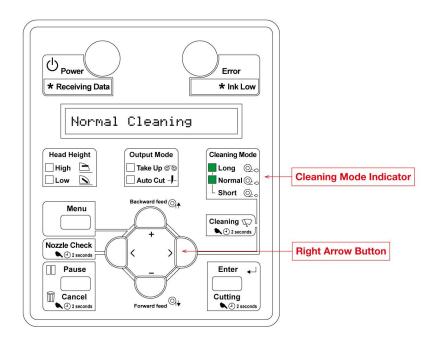

Press the Right Arrow Button once to switch between the Short, Normal and Long Cleaning Cycle. The green LED Indicators show you what mode is active.

## **Short Cleaning Cycle**

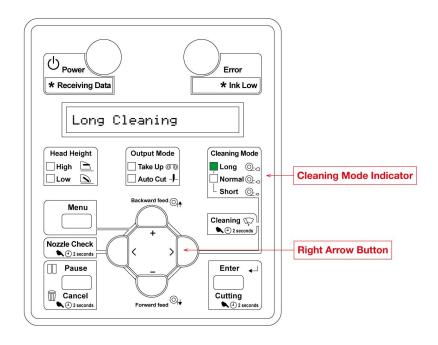

### **Normal Cleaning Cycle**

## **Long Cleaning Cycle**

Depending upon the severity of the issues you're facing, you might need to switch between the different Cleaning Cycles.

If several Manual Cleaning Cycles do not resolve the issue, Manual Daily Maintenance might be required.

If the issue continues to exist, please contact your local Technical Services Representative for further assistance.

The above Avery Dennison literature provides information to the user for proper application, storage and other requirements. Please refer to Product Data Bulletins or your local Avery Dennison Representative for warranty information. Find the latest information on the Avery Dennison website, <a href="https://www.reflectives.averydennison.com">www.reflectives.averydennison.com</a>.
