

Avery Dennison®

TrafficJet™ After Power outage

Service Bulletin : #9.42
Revision : # 01
Released : August 2019

If you have power supply issues or occasionally experience blackouts or power outages, then the following checklist will ensure your TrafficJet has the correct setup and ensures little downtime.

All of the settings below need to be checked and may not reset or change. The settings are on the TrafficJet front panel and are a guide only.

Any further quality issues after a power outage should be reported to your local Avery Dennison Technician immediately.

Here is the list of items to check and setup after a power outage on your TrafficJet printer.

1. User type

You will probably find your printer set to “TYPE 1”. This most likely means your user and therefore media settings are lost. By connecting your computer directly to the printer (on some networks it doesn't work), your technical service representative will be able to rename them (not mandatory)

2. Thickness

Under every user type, the thickness should be set up.

On your printer panel go to:

Press Menu > Setup > Press Right Arrow > User type > Press Enter > Type X > Press Enter > Print mode > 8 x down arrow > thickness

With the UP and DOWN arrow you will be able to adjust the desired thickness.

Press Menu to escape from the Menu.

Thickness values by media

T 1500 D : 300 microns

T 2500 D : 310 microns

T 6500 HIP : 410 microns

T 7500 B/MVP : 480 microns

T 9500 Omniview : 430 microns

T 11500 Omnicube : 480 microns

M 0500 D : 380 microns

MPI 1000 : 250 microns

MPI 2000 : 270 microns

W 6500 D : 350 microns

V 4000 : 280 microns

3. PF and temperature adjustments

The PF and temperatures values are managed by FLEXI.

4. Output mode

Your printer is equipped with a Take up system.

Press Menu > Setup > Right arrow > User type > Press the DOWN arrow 5 times > Output mode > Press Enter > With the UP and DOWN arrow you will be able to select "Take up"

Press Menu to escape

5. Auto cleaning

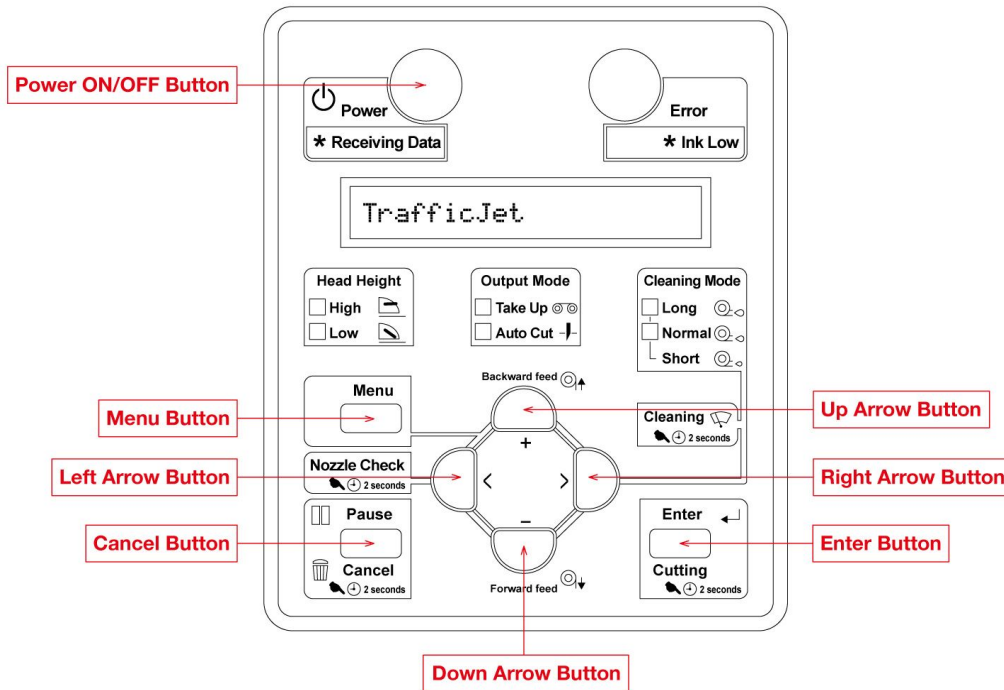

Your printer has an auto cleaning cycle, depending the Anti static bar installed.

Please refer to your local Avery Dennison Technician for the model you have installed.

Press Menu > Setup > Right arrow > User type > Press the DOWN arrow 14 times > Auto cleaning > Press Enter > With the UP and DOWN arrow you will be able to adjust those settings.

Autoclean Settings : Waiting Time 1440 > Printing time (**30** for old 929 Bar, **90** for new 924 Bar, **0** if Bar is not installed or turned OFF), Before Printing OFF.*

*As some regions may differ from the above settings. Please contact your local Avery Dennison Specialist to confirm auto clean settings suited for your region and individual requirements.

The above Avery Dennison literature provides information to the user for proper application, storage and other requirements. Please refer to Product Data Bulletins or your local Avery Dennison Representative for warranty information.
