

# Temporary Traffic Control: WR-7100M

Flexible channelizers are subjected to some of the worst roadside abuses imaginable. WR-7100M Series' solid layer construction resists the dirt, grime, and moisture that often destroys air-celled reflective sheeting, causing a critical loss of reflectivity.

## Features and Benefits

- High-tack adhesive bonds to low surface energy plastics for year-round performance, resisting cold-shock delamination
- Highly conformable to curved surfaces
- Durable construction won't rip or tear during application
- Abrasion resistant solid layer construction
- Long range visibility—day and night
- Exceeds the requirement of ASTM D4956 specification for Type III and IV retroreflective sheeting

## Availability

Product	Colors	Widths (in.)	Lengths (yds)
WR-7100M	White	3, 4, 6	50, 100, 200
WR-7101M	Yellow	3, 4, 6	50, 100, 200
WR-7108M	Red	3, 4, 6	50, 100, 200

Temporary application with long-term peace of mind—that's what you get with Avery Dennison temporary traffic control products. The reflective sheeting you choose matters.
